# Unexploded Ordnance (UXO) Risk & the UK Construction Industry

## Improve your awareness about 'UXO Risk & the UK Construction Industry' with free training

1st Line Defence is committed to enhancing safety in the construction industry by delivering free-of-charge Continuing professional development (CPD) seminars, presentations and online webinars – which have been designed to empower construction, development, environmental and engineering professionals about the risks of encountering items of UXO.

The CPD training will explain the importance of considering the possibility of UXO contamination as early as possible in the project cycle, and what can be done to both assess the risk and mitigate against it – if necessary.

### What is included in a CPD?

- Company introduction.
- Background to UXO Risk in UK.
  - » WWI and WWII Bombing.
  - » British and Allied Military Activity.
- Case studies of recent UXO finds.
- Risk Assessment Procedure.
  - » Preliminary UXO Risk Assessments.
  - » Detailed UXO Risk Assessments.
- Risk Mitigation Services.
  - » Non-Intrusive UXO Survey.
  - » Intrusive UXO Survey.
  - » UXO Specialist Support.
- Risk Mitigation Case Studies.

Various inert examples of different munitions will be available to study to raise awareness of some of the diverse types, sizes and shapes of UXO which can potentially be encountered.

The presentation is aimed at senior management and can be coordinated with monthly H&S meetings, group training days or can act as stand alone sessions. The seminar is approximately 1 hour in duration and we can tailor the presentation to suit your needs to get the most out of the session.

To book CPD training, [contact us](#) directly or visit the [CPD website](#).
